

Dear Khalsa Community,

Welcome back! Currently, the community level is green or low. [COVID-19 by County | CDC](#) Results from **pool testing** collected yesterday are **negative** for all groups. The currently **positivity rate is 3%** in Maricopa County.

While it feels a little strange for many of us, there is a joyous buzz in the classrooms as masks have become optional. The weather is beautiful and mixing the cohorts of students by level has been very successful. Friends can play together at recess and everyone enjoys the lovely spring temperatures.

The staff and administration are considering in-person events for the upcoming months and would love to celebrate the end of the year with a picnic at the Margaret Hance Deck Park. Stay tuned for further information!

Sincerely,

Karen Paxton
